PROFESSIONAL SUMMARY

Senior Software Engineer with experience in the IT industry since 2016, specializing in high-load and enterprise-grade systems. Proven track record leading technical direction, designing scalable microservice architectures, and delivering reliable, maintainable solutions. Polyglot engineer across Go, Java, and PHP who designs AI-powered systems (RAG pipelines, agentic workflows, and automation of routine processes) and builds for coding agents: Erebus, an open-source MCP server exposing 51 tools to AI agents.

TECHNICAL SKILLS

AI Tooling: Claude Code, Cursor, and GitHub Copilot on production work; agent-assisted review and refactoring

AI Architecture: LLM-integrated backend services (OpenAI, Anthropic APIs), RAG pipelines: embeddings, vector search, retrieval and reranking; prompt and context design, evaluation of model output

Agentic Engineering: AI agents with tool calling, Model Context Protocol (MCP) servers, multi-agent workflows, LLM-driven automation of routine business processes

Languages: Go, Java, PHP, C#, TypeScript, JavaScript, SQL / PL-SQL

Frameworks: Spring Boot, Node.js, .NET Core, Angular, React.js, Electron, Laravel

Messaging & Data: Apache Kafka, RabbitMQ, Redis, Elasticsearch, Avro, Oracle

Infrastructure & DevOps: Docker, Kubernetes, CI/CD, Camunda, Wiki.js, Git

Practices: Microservices, System Design, SDLC, High-load Systems, Observability / Alerting

PROFESSIONAL EXPERIENCE

Push30

Baku, Azerbaijan · On-site · Full-time

Senior Software Engineer *Mar 2026 – Present*

- Develop backend services across **Go**, **Java**, and **PHP**, contributing to core platform features and integrations.
- Delivered a production integration with a **Kazakhstani bank** for cross-border payments and banking.
- Authored shared libraries for **Apache Kafka** messaging and standardized logging across services.
- Established **SDLC** processes and configured monitoring and **alerting** to strengthen observability.
- Rolled out a company-wide **Wiki.js** documentation portal, centralizing engineering knowledge.

Deviofy FZCO

Dubai, UAE · Remote · Full-time

Technical Lead *Jan 2025 – Mar 2026*

- Led end-to-end development and feature delivery across multiple B2B2C products in the hospitality, live-entertainment, and creator-economy verticals.
- Designed the system architecture of a two-sided restaurant dining marketplace: discovery and booking flow, on-site redemption codes, a partner-facing analytics dashboard, and a reputation-based ranking model driving venue visibility.
- Designed the architecture of a real-time audience-engagement platform for live performers and event hosts: QR-based guest access with no sign-up, a live request queue with voting and paid prioritization, and tiered subscription plans.
- Managed cross-functional teams spanning Backend, Frontend, and QA to ensure seamless collaboration.
- Built and integrated **Stripe** monetization — subscription billing and one-off in-app purchases — to enable new revenue streams.

Kapital Bank

Baku, Azerbaijan · On-site · Full-time

Technical Lead *Sep 2024 – Jan 2025*

- Integrated mobile banking with the credit system via **Camunda** to enable online card delivery.
- Designed infrastructure diagrams, microservice decomposition, and dependency mappings; managed dependency switching and access control during migration to a new **Kubernetes** cluster.
- Created onboarding diagrams, roadmaps, and sessions to accelerate new team members' integration.

Senior Software Engineer *Apr 2021 – Sep 2024*

- Led digitalization of social government payments through mobile banking, reducing branch operational costs and increasing customer accessibility.
- Delivered chatbot identification features that optimized Average Handling Time (AHT) by **30%** and implemented automated card-issue resolution logic.
- Built a CRM admin panel with a role matrix and streamed call-center reporting into the Data Warehouse via **Kafka**.
- Developed Gateway, BFF, and microservice layers; provisioned **Elasticsearch, Kafka, and Redis** with DevOps and wrote PL/SQL data-migration scripts for Oracle.

Middle Software Engineer *Jul 2020 – Apr 2021*

- Decomposed a monolithic telephony application into independent micro-projects using **RabbitMQ**, improving scalability and maintainability.
- Developed socket-based interfaces and a real-time dashboard to intercept call events and monitor live telephony statistics.

Intelec Artificial Intelligence

Switzerland · Remote · Full-time

Software Engineer *Jul 2019 – Sep 2019*

- Designed and developed an image annotation system for Active Learning using **TypeScript** and **Angular**, working closely with the business team.

REMART Group

Azerbaijan · On-site · Internship

Software Engineer *Aug 2018 – Apr 2019*

- Built a ticketing system and an integrated CRM module with SMTP email dispatch using **PHP**, JavaScript, and Git.

r_keeper

Baku, Azerbaijan · Remote · Part-time

Software Engineer *Sep 2017 – Jun 2018*

- Developed a **C# / .NET Core** API for financial data transfer between POS and bonus systems, ensuring transactional consistency across cash and bonus operations.

SELECTED PROJECTS

Erebus — elkhan-isayev.github.io/erebus

Open-source Electron desktop client for Apache Kafka and RabbitMQ: live tailing at 1,000+ msg/s, Avro/Protobuf decoding, Schema Registry, consumer-group lag, and ksqlDB, plus an MCP server whose 51 tools let coding agents drive brokers.

Hubpoint.AI — hubpoint.ai

AI-powered appointment scheduling and business management platform with native iOS and Android apps, Firebase push notifications, and Stripe payments.

AzPulse — elkhan-isayev.github.io/azpulse

Live dashboard over Azerbaijan's open data (opendata.az), surfacing real-time country and market-demand signals.

CS 1.6 Web — github.com/Elkhan-Isayev/cs16-web

Counter-Strike 1.6 in the browser over LAN from one Docker container, built with WebRTC and Xash3D WASM.

EDUCATION

Baku State University

Baku, Azerbaijan

B.Sc. in Applied Mathematics and Computer Science *2016 – 2020*

CERTIFICATIONS, HONORS & AWARDS

Advanced Backend & Microservice Development — Ingress Academy *May 2024*

Certificate of Achievement covering Java, microservices, and related backend engineering practices.

ACM ICPC Semifinal — International Collegiate Programming Contest *Dec 2018*

Finished 4th with team BSU-1 at the 2018 Azerbaijan Subregional Contest.

LANGUAGES

Native / Bilingual: English, Azerbaijani, Russian, Turkish | **German:** Limited Working Proficiency
